Tim, these are out of hold time (which we realize for PCBs is sort of a moot point). Can they be resampled, trying to minimize the water?

Theresa,

Here are the numbers for PCB reanalysis.

Could you please ask Glenda to thoroughly homogenize each sample prior to taking her sample.

Thanks!

Tim

EAL ID	Sample Description
-----	-----
82699	RENTON CATCH BASINS #D1 295
82700	RENTON CATCH BASINS #CB 306
82701	RENTON CATCH BASINS #CB 381
82702	RENTON CATCH BASINS #CB 430
82703	RENTON CATCH BASINS #CB 438
82704	RENTON CATCH BASINS #CB 511
82705	RENTON CATCH BASINS #CB 526

EAL ID	Sample Description
-----	-----
82786	Renton Catch Basin CB 560I
82787	Renton Catch Basin CB 607
82788	Renton Catch Basin CB 638
82789	Renton Catch Basin CB 780

Tim, it looks like there is sufficient sample to reanalyze. Please send me a list of the exact EAL sample numbers you want reanalyzed and I can let Glenda know the good news. Most likely, it will be late next week when they are completed.

Doris,

Enclosed are the priliminary analytical results of the catch basins from the BECO site. They are priliminary due to th Cyanide equiptment at the EAL is down for maitenance. Based on the analytical so far it is non-hazardous waste. I anticipate the analitical results for Cyanide to be non-existant in the samples since the facility is an office park. I am forwarding this to MEL from EQM so he may have a copy of the priliminary analytical results with a bill of lading when he transports the stormwater to the Renton site decant station. I will also instruct Mel to co-ordinate with Brad at the treatment plant.

Thanks you all so much for all your support,

(EAL #82786-82789).msg
Renton Catch Basin Sample Results.msg

Attached please find the sludge data on some of the catch basins to be cleaned. I think we need to come up with a plan on how to manage this stuff. After we clean the catch basins I would also like to have our decant station vault cleaned out. Let me know what you think.
